

Two major successes for Habasit HyCLEAN

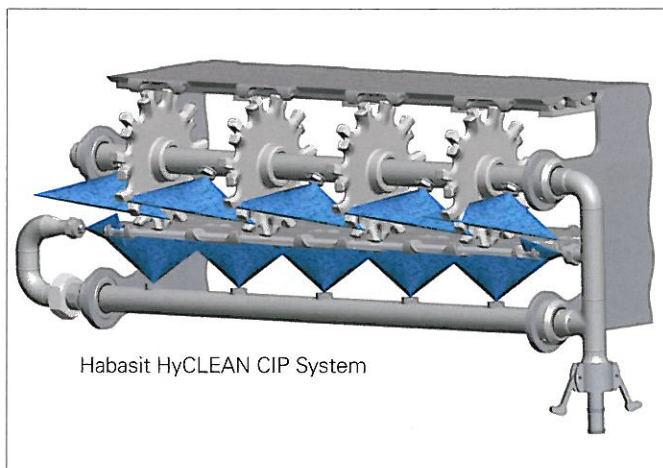

EHEDG (the European Hygienic Engineering & Design Group) has awarded a Certificate of Compliance to HyCLEAN plastic modular belts M5060 and M5065 with sprocket and CIP-system. Habasit is the first belt manufacturer to receive EHEDG certification for one of its solutions.

EHEDG certification

Our HyCLEAN plastic modular belts type M5060 and M5065 with sprocket and CIP system, were evaluated by the TUM (Technical University of Munich) Research Center Weihenstephan for Brewing and Food Quality in Germany. This EHEDG-authorized organization awarded and published the Certificate of Compliance at the end of December, 2011.

EHEDG certification logo

The award of this respected certificate to Habasit's solution provides conclusive independent proof that it meets the highest standards of hygienic equipment design.

Habasit HyCLEAN CIP System

The European Hygienic Engineering & Design Group (EHEDG) is a consortium of equipment manufacturers, food industries, research institutes, and public health authorities. It was founded in 1989 with the aim to promote hygiene during the processing and packing of food products.

The principal goal of EHEDG is the promotion of safe food by improving hygienic engineering and design in all aspects of food manufacture.

EHEDG actively supports European legislation that requires the handling, preparation, processing and packaging of food to be performed hygienically using hygienic machinery and in hygienic premises (EC Directive 2006/42/EC for Machinery, EN 1672-2 and EN ISO 14159 Hygiene requirement).

The second success: International FoodTec Award

HyCLEAN CIP, our highly efficient cleaning system for plastic modular belts, has also been honored with a Silver Medal International FoodTec Award. This was presented on March 27, 2012, at the Anuga Foodtec exhibition in Cologne, Germany. The award is made every three years by the DLG-Verlag (German Agricultural Society publisher) and its media partners, which include EFFoST (the European Federation of Food Science and Technology). The International FoodTec Awards recognize exemplary innovation in the European food industry and its equipment and component suppliers.

International FoodTec Award

Both the EHEDG Certificate of Compliance and the International FoodTec Award are a valuable recognition of a unique and innovative solution that delivers improved conveyor belt hygiene in the food processing industry.

To see for yourself the efficiency of our HyCLEAN CIP System, go to Youtube at www.youtube.com and type: "Habasit CIP cleaning efficiency" into the search bar. You can also go directly to: www.youtube.com/watch?v=CYjgzMEuKR0.
